

Riedex DM dust extractors operate with negative pressure and are designed for the extraction of wood working machines, but can also be used for dust and chips from plastics, aluminium and paper.

MOBILE DUST EXTRACTOR 2000 M³/H

Top of range performance

Low noise level, only 64 dB(A)

Compact dimensions

Detection of minimum air flow

Newest generation filters

100% clean air circulation

Highest fan efficiency

Enhanced negative pressure

Residual dust <0,05 mg/m³

2 year warranty

Technical data DM-160	
Motor	3 kW
Air flow (min.)	1448 m ³ /h
Pressure at inlet	3000 Pa
Air flow (max.)	2000 m ³ /h
Filter area	10,6 m ²
Filter regeneration	motor/jet
Residual dust content	<0,05 mg/m ³
Bin volume	160 Liter
Noise level	64 dB(A)
Voltage	400V/50Hz
Current	6,0 [A]
Weight	320 kg
Dimensions (LxBxH), max.	1875 x 840 x 2150 mm
Inlet diameter	160 mm
